

PERSONAL EXPENSE TRACKER

Top 3 ideas - Problem statements

1. Everyday expense tracker

Keep your daily money spending with this pretty simple personal daily expense tracker. Using this printable template, you can learn to be more conscious about your PP budget. This simple tracker is great for this purpose. In order to write down where you spend your money, you need to categorize your expenses. An understandable category and short description are all you need. You can also track your spending by choosing the types of stores you shop at. Fill in the amount of money you spend on it. For each day or week, record the date you are tracking and the actual money you spent. And the last step is to tick the box to see whether you pay cash, credit, or debit. Sections need and want will help you understand whether you really need this thing or is it just a fleeting weakness .

2. Expense-Time Graph

The application is used to keep in track of user's payments by taking input from the auto-generated notification from the banks, scanning bills or the user can manually update the expenditure details. Once the input is taken the application will generate an accurate Expense-Time graph based on the expenses. The user can analyse the graph easily instead of doing manual calculation and this helps to reduce their unwanted expenses.

3. Category Spend Analysis

Spend analysis is the process of identifying, gathering, cleansing, grouping, categorizing and analyzing your organization's spend data. This is done with the goal of decreasing procurement costs and improving efficiencies by increasing visibility and transparency.
